

*Preservation of natural resources, rational consumption and reduction of our carbon footprint:*  
**Together let's get greener for a better world !**

Our employees are the backbone of our initiative. They are made aware of environmental issues and trained in eco-friendly gestures. We pay careful attention to the cohesion and well-being of our team.

The success of our approach depends on the support of our guests. They are involved in the eco-responsible practices implemented in the hotel. Their well-being and satisfaction remains our priority and they are encouraged to give us feed-back after their stay.

We balance temperature between rooms and common areas.

We encourage our guests to use the heating and air-conditioning systems wisely.

Our building is equipped to save energy:

- centralized energy management system
- double-glazed windows in all bedrooms
- presence detectors in common areas
- lighting with low-energy LED bulbs

Water is precious: let's preserve it together!

Our guests are invited to reuse their towels and bed sheets.

Showers and taps are equipped with water-saving systems, without pressure reduction.

Toilet flushes are double flow.

We use eco-certified cleaning products and dry-steam for less pollution and more comfort.

The best waste is the one we do not produce !  
We reduce food waste.  
We are favoring bulk and recyclable packaging.

Single-use plastic is banned from our hotel; we offer in particular :

- filtered water and drinks in reusable or recycled glass bottles
- cosmetics in refillable dispensers

We reduce paper in reception; invoicing is electronic.

All our waste is sorted.  
Our rooms and the lobby feature sorting bins.

Furniture and equipment are recycled via charity or second-hand outlets.

Our discarded soaps are collected and reprocessed by a non-profit organization to be distributed as hygiene sets to those in need.

We choose suppliers and service providers who share our vision and help us select quality products in line with our commitment:

- breakfast and bar offering organic and PDO products, seasonal and locally sourced whenever possible
- environmentally friendly cosmetics
- eco-certified paper and cleaning products
- made in France furniture
